

# Index To Four-Letter Location Identifiers (ICAO) And Cross Reference Index

The International Civil Aviation Organization (ICAO) creates and modernizes the Standards and Recommended Practices (SARPS) to ensure safe, efficient and orderly evolution of international civil aviation procedure. The ICAO identified locations below adhere to the SARPS. The International Air Transport letter codes for each ICAO code has been added for ease in use. To conserve space only ICAO/IATA codes for stations in this book have been listed. NOTE: In some cases, no IATA code has been assigned to a location and only the ICAO code is provided.
